

Blessed Robert Widmerpool Foundation Stage Curriculum Overview

Train up a child in the way he should go; even when he is old he will not depart from it.
Proverbs 22:6

Blessed Robert Widmerpool Foundation Stage Unit:

- values a broad, rich, play-based curriculum in which children can develop their communication skills, confidence, curiosity and resourcefulness within an experiential setting that builds on and extends what they know already.
- is a place where nature and the outdoors is valued highly and is integral to children's everyday experience as a way of nurturing their well-being and giving them the space in which to explore, develop physically and learn.
- is a place where children are expected to be kind, respectful and loving towards all others and know that this is how they and their families will be treated too.
- supports children to know Jesus, to reflect on His teaching and to make it part of their own lives.
- gives children a strong foundation on which to build their future academic learning.

Catholic Social Teaching

Throughout their time at school, children will be encouraged to live out the Catholic Social Teaching values of:

- Human Dignity – knowing that everyone is special and deserves respect
- Promoting Peace – helping everyone get along and be friends
- Stewardship – looking after our world

The characteristics of effective teaching and learning

In planning and guiding what children learn, practitioners must reflect on the different rates at which children are developing and adjust their practice appropriately. Three characteristics of effective teaching and learning are:

- playing and exploring – children investigate and experience things, and 'have a go'
- active learning – children concentrate and keep on trying if they encounter difficulties, and enjoy achievements
- creating and thinking critically – children have and develop their own ideas, make links between ideas, and develop strategies for doing things

Statutory framework for the EYFS

Special Educational Needs and Disability – Quality First Teaching

- Make sure you have a child's attention when talking to him/her by calling his/her name and making sure that he/she can see you.
- Be aware children need to hear words lots of times, in the same situation, before understanding them.
- Use simple language accompanied by signs, actions and gestures for all children as they learn to understand English.
- Leave gaps for children to be motivated to fill in the spaces with language.
- Activities are play-based, involve moving to learn, low-access and open-ended.
- Links are made to support children to remember previous learning.
